In Reasoning Part, another important Topic is Inequality Problems. In inequality problems, each problem will have a statement followed by conclusions. We can easily score 4-5 marks from this topic in few minutes. Inequality is common topic for all

competitive exams. It is one of the topic, where you can get full marks very easily. We are going to explain a very simple method and we assure you that it's possible to solve 5 questions in just one minutes.

So, let's learn this topic.

S.No	Symbol	Symbol Meaning					
1.	>	First element is Greater than Second element.					
2.	<	First element is Smaller than Second element.					
3.	=	First element is Equals to Second element.					
4.	≥	First element is Greater than or Equals to Second element.					
5.	≤	First element is Smaller than or Equals to Second element.					
6.	<b>≠</b>	First element is either greater than or smaller than Second element.					

## RULES:

">" (more than) & "≥" (more than equal to) symbol explanation:

If the conclusion contains ">" (more than) symbol:

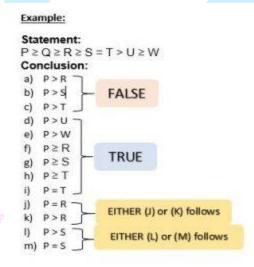

- 1. It will satisfies if, ">" (more than) symbol present in the statement between objects.
- 2. It will also follow "= (equal to)", "≥ (more than equal to)" symbols but "> (more than)" symbol must be present at least in statement between the objects as per the conclusion.

*If the conclusion contains "≥" (more than equal to) symbol:* 

- It will satisfies if, "≥" (more than equal to) symbol present in the statement between objects.
- 2. It will also follow "= (equal to)" symbol, but "≥ (more than equal to)" symbol must be present at least

in statement between the objects as per the conclusion.

Note: if the statement contains "≥ (more than equal to)" symbol, and conclusion has "= (equal to)" & ">" (more than) symbol, in this case either option will come into existence.

"<" (less than) & "≤" (less than equal to) symbol explanation:

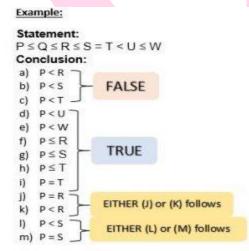

If the conclusion contains "<" (less than) symbol:

- 1. It will satisfies if, "<" (less than) symbol present in the statement between objects.
- 2. It will also follow "= (equal to)", "≤ (less than equal to)" symbols but "< (less than)" symbol must be present at least in statement between the objects as per the conclusion.

If the conclusion contains "≤" (less than equal to) symbol:

- 1. It will satisfies if, "≤" (less than equal to) symbol present in the statement between objects.
- 2. It will also follow "= (equal to)" symbol, but "≤ (less than equal to)" symbol must be present at least in statement between the objects as per the conclusion.

Note: if the statement contains "≤ (less than equal to)" symbol, and conclusion has "= (equal to)" & "<" (less than) symbol, in this case either option will come into existence.

SIGN	SIGN	ANSWER		
>	<	False		
>	5	False		
<	>	False		
<	2	False		
≤	≥	False		
2	5	False		

## Example 1:

#### Statement:

#### Conclusion:

**Explanation:** Sign used in statement as compared to conclusions are opposite, so the conclusion will be false.

## Example 2:

#### Statement:

$$P \ge Q \le R \ge S \le T$$

## Conclusion:

## Important Points :-

**Explanation:** Sign used in statement as compared to conclusions are opposite, so the conclusion will be false.

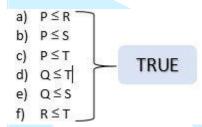

Note 2: If same sign used between object than answer will be true.

mer som anne albunaca nermetri anheri mun ammir min ac mati						
SIGN	SIGN	ANSWER				
>	>	True				
>	3	True				
<	<	True				
	S	True				
5	5	True				
2	2	True				

## Statement:

$$P \le Q \le R \le S \le T$$

## Conclusion:

Explanation: Sign used in statement as compared to conclusions are SAME, so the conclusion will be TRUE.

## Example 3:

Statement

S.No

## Important conclusion Based on Statement

Conclusion

1.	A > B > C		
2.	$A > B \ge C$		
<i>3</i> .	$A \ge B > C$	A > C	
4.	A = B > C		
5.	A > B = C		
6.	A < B < C		
<i>7</i> .	$A < B \le C$		
8.	$A \leq B < C$	A < C	
9.	A = B < C		
10.	A < B = C		
11.	$A \ge B \ge C$		
<i>12</i> .	$A = B \ge C$	$A \ge C(Either\ A > C\ or\ A = C)$	
<i>13</i> .	$A \ge B = C$		
14.	$A \leq B \leq C$		
<i>15.</i>	$A = B \le C$	$A \leq C$ (Either $A < C$ or $A = C$ )	
<i>16</i> .	$A \leq B = C$		
<i>17</i> .	A < B > C	Either 1 or 2 follows if any of the following case	es (a, b,
18.	$A \leq B > C$	c and d) are given as they form a complementar	
19.	$A < B \ge C$		

$$20. A > B < C$$

a) 1. 
$$A > C$$
 2.  $A \le C$ 

$$21. A > B \le C$$

b) 
$$1. A \ge C$$
  $2. A < C$ 

$$22. A \ge B < C$$

c) 1. 
$$A < C$$
 2.  $A \ge C$ 

d) 
$$1. A \leq C$$
  $2. A > C$ 

## Example of Coded Inequality in Reasoning

**Directions:** In the following questions, the symbols  $\delta$ , @, ©, % and  $\star$  are used with the following meaning as illustrated below.

'A  $\bigcirc$  B' means 'A is not smaller than B'.

 $^{\prime}A\%B^{\prime}$  means  $^{\prime}A$  is neither smaller than nor equal to  $B^{\prime}$ .

' $A \star B$ ' means 'A is neither greater than nor equal to B'.

'A  $\delta$  B' means 'A is not greater than B'. 'A @ B' means 'A is neither greater than nor smaller than B'.

Now in each of the following questions assuming the given statements to be true, find which of the four conclusions I, II, II and IV given below them is / are definitely true and give your answer accordingly.

#### Statements:

 $P \delta T$ , T @ R, R © O, O % K

#### **Conclusions:**

I. R @ P

II. R % P

III.  $K \star T$ 

IV.  $O \delta T$ 

- 1) Only either I or II is true
- 2) Only III and IV are true
- 3) Only either I or II and III are true
- 4) Only either I or II and IV are true
- 5) Only either I or II and III and IV are true

Follow the steps given below to simplify the process.

## Steps Involved in Solving Coded Inequality in Reasoning

## Step 1: Make Decoding Table.

The easiest method is to first make a table as shown below.

Α	is			
Symbol		2-57	7.0	I
Meaning		134	23 - 3	-
Tha	ın l	В	177	35

**NOTE:** Elements used in question are A and B so we have added A and B in table.

TIP: Sometimes, to make questions more complicated, reverse relations may be given as:

'A \* B' means 'B is not smaller than A'.
So here we will write B in the first row and
A in the last row.

Step 2: Add Symbols to Table

A	15			
0	%	*	δ	@
		A is		

Step 3: Start decoding symbols one by one. Then add decoded operator into the table. Here symbols are:

 $\mathbb{C} \to not \ smaller \ than \to means \ greater$ than or equal to  $\to$  ' $\geq$ '

%  $\rightarrow$  neither smaller than nor equal to  $\rightarrow$  means greater than  $\rightarrow$  '>'

 $\star \rightarrow$  neither greater than nor equal to  $\rightarrow$  means smaller than  $\rightarrow$  '<'

 $\delta \rightarrow$  not greater than  $\rightarrow$  means smaller than or equal to  $\rightarrow$  ' $\leq$ '

ⓐ → neither greater than nor smaller than  $\rightarrow$  means equal to  $\rightarrow$  '='

So our decoding table becomes:

	Α	is			
Symbol	0	%	*	δ	@
Meaning	2	>	<	<	=:
	Tha	n B	F8 - 35	- 10	

We will now use this decoding table to solve the actual questions.

Step 4: Decode Statements using Decoding Table.

1200	is			
0	%	*	δ	@
≥	>	<	≤	2
֡	© ≥	© % ≥ >	© % * ≥ > <	<ul><li>∅ % * δ</li><li>≥ &gt; &lt; ≤</li></ul>

Statements:  $P \delta T$ , T @ R, R © O, O % KDecoded statements:  $P \leq T$ , T = R,  $R \geq O$ , O > K

Step 5: Combine Decoded Statements

Combined statement will be:  $P \le T = R \ge O$ > K

## Step 6: Conclude Individually

Look at conclusions one by one, decode each conclusion using the Decoding Table.

Then check whether the conclusion follows or not.

	Α	is			
Symbol	O	%	*	δ	@
Meaning	2	>	<	<	82
- 10	Tha	n B	F84 - 35*		

Conclusion I:  $R \otimes P \rightarrow R = P$ 

Now from the combined statement we get,  $P \le T = R$ .

According to priority level we get,  $P \le R$ . Thus R = P is false.

Conclusion II:  $R \% P \rightarrow R > P$ 

From the combined statement we get,  $P \le T$ = R.

Thus again we get  $P \le R$ . So R > P is false.

But we know from the combined statement that  $P \le R$ . Hence either conclusion I or II has to be true as they form complementary pair.

## Inequality Questions with Solutions

Directions (1-5): In the following questions the symbols #, \*, @. \$ and = are used with the following meanings:

- 1) A # B means A is greater than B.
- 2) A \* B means A is greater than or equal to B.
- 3) A @ B means A is equal to B.
- 4) A \$ B means A is lesser than B.
- 5) A = B means A is lesser than or equal to B.

Now in each of the following questions, assuming the three statements to be true, find which of the two conclusions
I and II given below them is/are true. Give answer.

- a) if only conclusion I is true
- b) if only conclusion II is true
- c) if either conclusion I or conclusion II is true
- d) if neither conclusion I nor conclusion II is true
- e) if both conclusions I and II are true.
- 1. Statements: P # Q, R \$ P, R \* O

Conclusions:

*I. Q* # *R* 

II. Q \$ R

2. Statements: P = Q, T @ R, R # P

Conclusions:

I. T = Q

II. Q \*T

3. Statements : P @ Q, L @ M, P # L

**Conclusions**:

*I. Q* # *M* 

II. M \$ P

4. Statements: P # M # L, L# N @ Q, Q \$ S

@R

**Conclusions**:

I. R @ M

II. L @ R

5. Statements: P \* Q, Q @ T, T \* L

Conclusions:

I. Q # L

II. T # P

Directions (Q. 6 - 10): In the questions given below, certain symbols are used with the following meaning:

- 1) P @ Q means P is greater than Q.
- 2) P + Q means P is either greater than or equal to Q.
- 3) P = Q means P is equal to Q.
- 4)  $P \odot Q$  means P is smaller than Q.
- 5) P Q means P is either smaller than or equal to Q.

Now in each of the following questions assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true?

Give answer

- a) if only conclusion I is true,
- b) if only conclusion II is true,
- c) if either I or II is true,
- d) if neither 1 nor II is true, and
- e) if both I and II are true.

6. Statements: B @ V, K © C, C - B Conclusions:

I. V @ C

**II.** B @ K

7. Statements: K @ T, \$ = K, T - R

## Conclusions:

*I.* S @ R

II. T = R

8. Statements: U = M, P + U, M @ B

Conclusions:

I. P = B

**II.** P @ B

9. Statements: L + N, J - P, P + L

Conclusions:

I. J = L

II. P = N

10. **Statements:** H + G, D @ E, H = E

Conclusions:

I. D @ H

II.  $G \odot D$ .

Directions (Q. 11 - 15): In the questions given below, certain symbols are used with the following meaning:

- 1) A @ B means A is greater than B.
- 2) A + B means A is either greater than or equal to B.
- 3) A # B means A is smaller than B
- 4) A % B means A is either smaller than or equal to B.
- 5) A \$ B means A is equal to B
  Now in each of the following questions
  assuming the given statements to be true
  find which of the two conclusions I
  and II given below them is/are definitely
  true? Give answer
- a) if only conclusion I is true.
- b) if only conclusion II is true,
- c) if either I or II is true.
- d) if neither I nor II is true.
- e) if both I and II are true.

11. **Statements:** T \$ G, K @ P, M # T, P +

M

Conclusions:

I. K @ T

II. G \$ P

12. **Statements:** R + N, S % B, A @ R, B \$ A

Conclusions:

I. S \$ N

II. A @ N

13. Statements:  $G \ \ \, K, F \ \ \, @ \ \, J, K + Q, Q +$ 

F

Conclusions:

*I. K* \$ *F* 

**II.** F # K

14. Statements: W @ S, K % Z, U + W, S \$

K

Conclusions:

I. U @ K

II. Z @ S

15. Statements:  $G \$  E, D # K, E # S,  $K \times G$ 

**Conclusions:** 

I. S @ D

**II.** D# E

Directions (Q. 16-20): In the following questions the symbol \$, @, \*, \*\* and # are used with the following meaning.

- 1) A \$ B means A is greater than B
- 2) A @ B means A is either greater than or equal to B
- 3) A \* B means A is equal to B
- 4) A \*\* B means A is smaller than B
- 5) A # B means A is either smaller than or equal to B

Now in each of the following questions assuming the given statements to be true, find which of the two conclusions
I and II given below them is/are definitely
True? Give answer

- a) if only conclusion I is true.
- b) if only conclusion II is true.
- c) if either I or II is true.
- d) if neither I nor II is true.
- e) if both I and II are true.
- 16. Statements: P @ Q, M # N, N\*\*Q Conclusions:

I. P \$ M

**II.** N # P

17. Statements:  $D^{**}X$ , F @ Y, D \$ F Conclusions:

I. X @ Y

II. Y # D

18. Statements: M\*\*P, S \$ T, M @ T Conclusions:

I. S \* M

II. T \*\* P

19. Statements: U\*V, X \$ W, U\*\*W Conclusions:

*I. W* \$ *V* 

*II.* U \*\* X

20. Statements:  $G \ H, J \# K, H * K$ Conclusions:

*I. H* \$ *J* 

II. J \* H

Directions (Q, 21-25): In the following questions the symbols \$, @, \*, # and ? are used with the following meanings.

1) A \$ B means A is greater than B.

- 2) A @ B means A is either greater than or equal to B.
- 3) A \* B means A is equal to B.
- 4) A # B means A is smaller than B.
- 5) A? B means A is either smaller than or equal to B.

Now in each of the following questions assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true? Give answer.

- a) If only conclusion I is true.
- b) If only conclusion II is true.
- c) If either I or II is true.
- d) If neither I nor II is true.
- e) If both I and II are true.
- 21. Statements: *M* # *N*, *T* \$ *U*, *N* # *U*Conclusions:

*I. M* ? *T* 

II. T \$ N

22. **Statements:** P \$ T, G ? N, T @ N

Conclusions:

**I.** P \$ N

**II.** G ? T

23. Statements: P? Q, R \$ S, Q @ S

Conclusions:

**I.** P \$ S

**II.** R # Q

**24. Statements:** J # K, K \* F, H @ F

**Conclusions:** 

**I.** J ? H

II. H \$ K

25. **Statements:** D @ F, G \$ H, F ? H

Conclusions:

*I. G* \$ *F* 

### **II.** D @ H

Directions (Q. 26-30): In the questions given below, certain symbols are used with the following meanings:

- 1) A @ B means A is greater than B.
- 2) A \* B means A is either greater than or equal to B.
- 3) A # B means A is equal to B.
- 4) A \$ B means A is either smaller than or equal to B.
- 5) A + B means A is smaller than B. Now in each of the following questions, assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true? Give answer
- a) if only conclusion I is true
- b) if only conclusion II is true
- c) if either conclusion I or II is true
- d) if neither conclusion I nor II is true
- e) if both conclusions I and II are true
- 26. Statements: B + D;  $E \ T$ ; T \* P; P @ B Conclusions:

*I. P\$D* 

II. P@D

27. **Statements:** E \* F; G \$ H; H # E; G @ K

Conclusions:

*I. H*@*K* 

*II*. *H*\**F* 

28. Statements: P \$ Q; N # M; M @ R; R \* P

Conclusions:

**I.** *P*+*N* 

**II.** Q\$M

29. Statements: D + T;  $E \$  V; F \* T;  $E \$  D Conclusions:

*I. D\$V* 

II. D + F

30. Statements: T\*U;  $U \$  W;  $V \$   $Q \$  L;  $W + V \$  Conclusions:

I. V @ T

II. L # W

Directions (Q. 31-35): In the following questions, the symbols +,  $\times$ , =,  $\div$ , and - are used with the following meaning:

- 1) P + Q means P is greater than Q.
- 2)  $P \times Q$  means P is either greater than or equal to Q.
- 3) P = Q means P is equal to Q.
- 4)  $P \div Q$  means P is smaller than Q.
- 5) P-Q means P is either smaller than or equal to Q.

Now in each of the following questions assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true. Give answer

- a) if only conclusion I is true,
- b) if only conclusion II is true,
- c) if either I or II is true.
- d) if neither I nor II is true.
- e) if both I and II are true.

31. Statements: U + V, W - Y,  $Y \times U$ Conclusions:

I. W + U

II.  $W \div V$ 

32. Statements:  $B \div A$ ,  $D \times E$ , E + A

Conclusions:

I. D + A

**II.** B ÷ E

- 33. Statements:  $S \times Q$ , R + T, R S Conclusions:
- I. S + T
- II. Q = T
- 34. Statements:  $M \div N$ ,  $P \times Q$ , P + N Conclusions:
- I. N + Q
- II. N-Q
- 35. Statements: G H,  $K \times L$ , L G Conclusions:
- $I. G \div K$
- II. L-H

Directions (Q. 36-40): In the following questions the symbols @, c,  $\pounds$ , ? and \$ are used with the following meanings:

- 1. A @ B means A is neither equal to nor smaller than B.
- 2. A c B means A is neither greater nor smaller than B.
- 3. A £ B means A is not equal to B.
- 4. A? B means A is neither greater than nor equal to B.
- 5. A \$ B means A is either greater or equal to B.

Now, in each of the following questions, assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true. Give answer

- a) if only conclusion I is true
- b) if only conclusion II is true
- c) if either I or II is true
- d) if neither I nor II is true
- e) if both I and II are true
- 36. **Statements:** N ? S, S @ P, P £ M

Conclusions:

*I.* S@M

II. PcN

- 37. Statements: JcP, P\$N, J£H Conclusions:
- I. JcN

II. H@P

38. **Statements:** Z @ D, F c D, F \$ G

Conclusions:

I. DcG

II. Z@G

39. **Statements:** L @ T, P ? T, K\$L

Conclusions:

**I.** L@P

**II**. K@T

40. Statements: R c U, U ? Q, W \$ R Conclusions:

I. WcU

**II.** W@ U

Directions (Q. 41-45): In the following questions, certain symbols are used with the following meanings:

- 1. A # B means A is not greater than B.
- 2. A \$ B means A is neither smaller than nor equal to B.
- 3. A? B means A is neither greater than nor smaller than B.
- 4. A \* B means A is neither greater than nor equal to B.
- 5. A @ B means A is not smaller than B. Now in each of the following questions, assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true. Give answer

- *a) if only conclusion I is true;*
- b) if only conclusion II is true;
- c) if either I or II is true;
- d) if neither I nor II is true; and
- e) if both I and II are true.
- 41. Statements:  $P \ Q$ ,  $R \ @ S$ , P \* R Conclusions:

*I. Q\*R* 

**II.** P # S

42. Statements:  $U \$  V, W \* X, U @ X Conclusions:

I. V@X

 $II.\ V*X$ 

**43. Statements:** K # T, D \$ F, T \* F

Conclusions:

*I. K*\**D* 

II. D \$ T

44. Statements: M\$N, G@H, N?H

Conclusions:

I. M@H

II. M \$ G

45. Statements: G@M, N#L, G\*L

Conclusions:

I. G@N

II. L \$ M

- Directions (Q. 46-50): In the following questions, the symbols @, &, \*, \$ and ? are used with the following meanings:
- 1) P? Q means P is either equal to or smaller than Q.
- 2) P \$ Q means P is neither greater than nor smaller than O.
- 3) P\*Q means P is neither greater than nor equal to Q.

- 4) P @ Q means P is either greater than or equal to Q.
- 5) P & Q means P is not equal to Q. Now in each of the following questions, assuming the given statements to be true, find which of the two conclusions I and II given below them is/are definitely true. Give answer
- a) if only conclusion I is true;
- b) if only conclusion II is true;
- c) if either 1 or II is true;
- d) if neither I nor II is true; and
- e) if both I and II are true.
- 46. Statements: K\$M, N&M, J@K

Conclusions:

I. J? M

II. K \$ N

47. **Statements:** K @ R, L & B, B ? K

Conclusions:

**I.** B ? R

*II*. *R*\**L* 

48. **Statements:** J\*M, W\$E, J@W

Conclusions:

*I. M*?W

**II.** J ? E

49. **Statements:** R @ S, S ? U, T \$ R

Conclusions:

**I.** T\$S

II. T? U

50. Statements: A\*B, B? C, C@ D Conclusions:

I. A\$D

II. B ? D

Directions (Q. 51-57): In the following questions the symbols +, \*, ?, @ and S are used with the following meanings:

- 1) P + Q means P is neither smaller nor greater than Q.
- 2)  $P \times Q$  means P is neither equal to nor smaller than Q.
- 3) P? Q means P is neither greater than nor equal to Q.
- 4) P @ Q means P is either greater than or equal to Q.
- 5)  $P \$  Q means P is not equal to Q.
- 51. Statements: P\$Q,  $Q \times R$ , P + R

Conclusions:

I.  $Q \times P$ 

II. P ? Q

III. R x P

- A. I only
- B. I and II only
- C. Either I or III only
- D. All I,II and III
- E. None follows
- 52. **Statements:** A + B, B \$ C, C ? A

**Conclusions:** 

I. C \$ A

II. B+C

III. C ? A

- A. None follows
- B. Only I
- C. Only II
- D. Only III
- E. Only II & III
- 53. Statements: Y@Z,  $Z \times Q$ ,  $Q \$  P

Conclusions:

*I. Y* ? *Q* 

**II.** Y? P

**III.** Z @ P

- A. None follows
- B. Only I
- C. Only II
- D. Only III
- E. Only II & III
- 54. Statements:  $E \times F$ , F @ L, L + N

Conclusions:

I. N + F

H.  $E \times L$ 

III.  $E \times N$ 

- A. None follows
- B. Only I
- C. Only II
- D. Only III
- E. Only II & III
- 55. Statements:  $H@J, J?K, K \times M$

Conclusions:

I. H @ M

II.  $M \times J$ 

III.  $H \times K$ 

- A. None follows
- B. Only I
- C. Only II
- D. Only III
- E. Only II & III
- 56. Statements: M@T, T + V, V?E

Conclusions:

I. V + M

II. V?M

III.  $E \times T$ 

- A. Only either I or II
- B. Only III
- C. Only I & II
- D. All I, II & III
- E. Only either I or II and III
- 57. Statements:  $H@J, J?K, K \times M$

## Conclusions:

*I. H* @ *K* 

*II.*  $M \times H$ 

III.  $H \times K$ 

A. None follows

B. Only I

C. Only II

D. Only III

E. Only II & III

## Directions (Q. 58-62): In the following questions the symbols \*, $\times$ , S, @ and + are used with the following meaning:

1) 'PxQ' means 'P is neither smaller nor greater than Q'

2) 'P@Q' means " P is neither equal to nor greater than Q'

3) P\*Q means P is either equal to or smaller than Q

4) P+Q means P is neither equal to nor smaller than Q.

5) 'P \$Q' means 'P is not equal to Q'.

## 58. Statements: D\*F, F\$M, M@K

## Conclusions:

*I.* F @ K

II. D @ K

III. D \* M

A. None follows

B. Only I

C. Only II

D. Only III

E. Only II & III

59. Statements: K + M, M@R,  $R \times T$ 

Conclusions:

I. K + T

II. T + M

III. R + K

A. None follows

B. Only I

C. Only II

D. Only III

E. Only II & III
