Syllogism Tricks & Tips

Syllogism is one of the most important and interesting topics in Reasoning and Solving. Syllogism is always fun if you understand the shortcuts. If you understand the below concepts I assure you that you can solve 5 syllogism problems in just 1 min.

Syllogism often appears as a part of Logical Reasoning or Verbal Reasoning. It consists of some premises (statements) and one or more conclusions. The conclusions are derived from the given statements. The statements and conclusions may often seem to be illogical or go against what we know to be facts according to our daily lives. But we MUST assume the statements to be true. Whether the conclusion is true or not in the context of the true statements given, is what the question is about in syllogisms.

Have a Pen with you. Go through all the concepts one by one. Understand how to draw Venn Diagrams for each concepts. Then understand how the conclusion are made for each concepts. (Just don’t Scroll down fast!!!).

In syllogism all you need to understand the statement, draw the Venn diagram one by one and derived the conclusion.

Point to Remember while Solving Syllogism

- Anything is possible in a statement.
- Negative Answer will never be there.

Simple Case:

Concept-1
Statement: All A is B.
Venn diagram:

Conclusions:
- a) All A is B
- b) Some A is B
- c) Some B is A

Concept-2
Statement: Some Apple is Fruit. Some Fruit
is Mango.

Venn diagram:

**Concept-4**

Statement: All A is B. Some B is C.

Venn diagram:

Conclusion:

a) All A is B
b) Some A is B
c) Some B is A
d) Some B is C
e) Some C is B

Note: There is no direct relation between A & C, so it is not possible to derive any conclusion between A & C.

**Concept-5**

Statement: All B is A. All C is A.

Venn diagram:

Conclusion:

a) All B is A
b) All C is A
c) Some B is A
d) Some A is B
e) Some C is A
f) Some A is C

Note: There is no direct relation between B & C, so it is not possible to derive any conclusion between B & C.
Concept-6
Statement: No A is B.
Venn diagram:

Conclusion:
a) No A is B
b) No B is A
c) Some A is not B
d) Some B is not A

Concept-7
Statement: All A is B No B is C.
Venn diagram:

Conclusions:
a) All A is B
b) Some A is B
c) Some B is A
d) No B is C
e) No C is B
f) Some B is not C
g) Some C is not B
h) No A is C
i) No C is A
j) Some A is not C
k) Some C is not A

POSSIBILITY CASE:
When the term possibility arises in conclusion, we need to check:
• When “Some Relation” is given in statement and “All” is desired in the conclusion [POSSIBILITY=TRUE]
• When “No Relation” is given in statement and “All/Some” is desired in the conclusion [POSSIBILITY=TRUE]

In a statement these word are possibilities:
• Can be
• Possible
• May be / might be
• Chances
• Occurs
• is being a possibility
• is a possible

In a statement these word are sureties:
• Can Never be
• Can
**Rule-1**

**Statement:** All A is B.

**Venn diagram:**

- Possibility: All B being A is a possibility.

**Example:**

**Statement:** Some Apple is Fruit. Some Fruit is Mango. Some Mango is Tree

**Venn diagram:**

**Conclusion:**
- a) Some Apple being Mango is a possibility.
- b) Some Mango being Apple is a possibility.
- c) Some Apple being Tree is a possibility.
- d) Some Tree being Apple is a possibility.
- e) Some Fruit being Tree is a possibility.
- f) Some Tree being Fruit is a possibility.

**Rule-2**

**Statement:** Some A is B.

**Venn diagram:**

- Possibility: All B being A is a possibility.

- a) All A being B is a possibility
- b) All B being A is a possibility
