A word is represented by only one set of numbers as given in any one of
the alternatives. The sets of numbers given in the alternatives are
represented by two classes of alphabets as shown in the given two
matrices. The columns and rows of Matrix-I are numbered from 0 to 4 and
that of Matrix-II are numbered from 5 to 9. A letter from these matrices can
be represented first by its row and next by its column, for example, ‘N’ can
be represented by 10, 41, etc., and ‘G’ can be represented by 56, 99, etc.
Similarly, you have to identify the set for the word “CROW”.

एक शब्द केवल एक संख्या-समूह द्वारा दर्शाया गया है, जैसा कि विकल्पों में से

Keeping employees happy, motivated, and on the payroll is one of the key concerns to businesses these days because it's an open market for top talent. A good employee can walk out of the door today and have a comparable or better job tomorrow. Which brings up a very important question: what would the companies do to keep away that person from even thinking about going to work elsewhere? Gone are the days when the monthly paycheck and two weeks' vacation a year were enough to keep employees happy. Employers must come up with irresistible incentives to keep top talent onboard. The results of a recent survey by Fortune Magazine on why people leave their jobs shows that 30 percent leave for better compensation and benefits, 27 percent for a better career opportunity, 27 percent for new experience, 21 percent are dissatisfied with opportunities at current job, and 16 percent desire to change careers or industries. Money is no longer the only major motivator. So, is this an onsite daycare center for working parents? Paying for all or part of their health insurance? Or offering educational assistance or paying for certification? On an annual ski trip, paid foreign tours, onsite car washes and oil changes? Or free laundry and dry cleaning facilities?
